**Video call & Screening tests**

# Registration & multilingual Support

- Our Phone Authenticated Registration process brings an ease to the general flow in account creation as the user only requires a cell phone by their side and nothing more.
- Alternatively, there's also the standard registration for users in case of rural settings.
- To make the platform's reach even wider we've offered Multi-Lingual support currently with English and Hindi which could be diversified as per need of the locality.

# POSTING JOBS

- To help with publishing jobs on the portal we've used OCR to digitise Documents with Job Descriptions and in turn assess and review the generated data accordingly.
- The generated data is segregated accordingly into relevant fields for Job Postings.
- It also has a section where the user could review the data manually and select data snippets if any machine discrepancy occurs through the “Copy to Clipboard” functionality.

Description: The Job Profile of

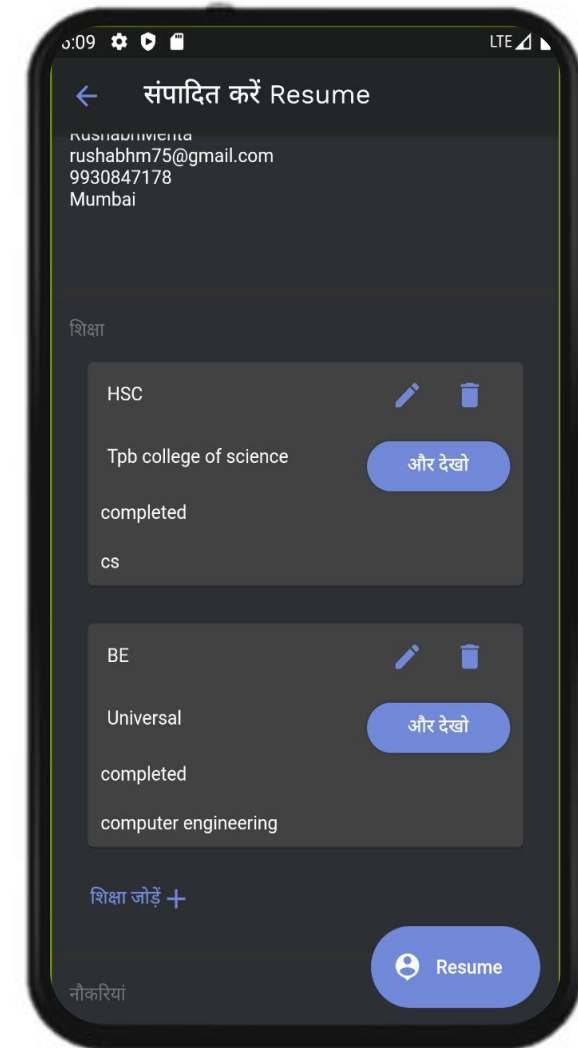

# Courses

- Our Courses Section caters to the users with job-oriented courses across categories based on their expertise and interests, co-related with desirable skill sets from industries.
- The Course recommendation system works with respect to the current industry trends and the user's background, past work experience and other prominent factors.

# Resume Builder

- The Resume section makes it effortless for the users for making their Job Applications.
- The users could save their Resume on the platform and not worry about including it with every Job Application the proceed with.
- Users could also use their existing Resume upload it to the portal and through OCR we will fill the Resume fields which they could edit further according to their preference.

# Video Call & Screening Tests.

- This portal will also manage the further interview and selection process of the candidates and maintain the communication thread between them.
- Screening tests will also help the recruiters to assess candidates beforehand with the the standard they are looking for filtering potential candidates even further.
- And Video Interviews could assist recruiters to quickly compare candidates without delaying the hiring process.
